Install Savings - Milliken Floor Compatibility

Milliken modular backings are non-reactive and contain no PVC or plasticizers. This greatly simplifies the floor preparation process and typically eliminates the necessity of old adhesive removal. All Milliken Modular Carpets carry the “Lifetime Floor Compatibility Warranty.” **No chemical incompatibility exists between Milliken Modular Carpet or Milliken Modular Carpet Adhesive and any existing flooring adhesive.**

Key Benefits

1. Reduce the time needed to remove old adhesives thus reducing carpet installation time
2. Will not cause a chemical reactivation of old adhesives due to plasticizer migration
3. Eliminates the odors and Indoor Air Quality issues associated with plasticizer migration
4. Old adhesive will not damage or destroy the construction of Milliken Modular Carpet
5. Eliminates any concern for costly remediation of incompatible floor covering problems with subfloor, old adhesives, or sealers which could amount to over \$50.00 per yard

Random 2 Moisture Management

Moisture is absorbed, wicked across the tile and released through seams

1. StainSmart technology repels and beads surface moisture
2. AlphaSan antimicrobial inhibits mold, mildew and odor
3. Primary coating prevents liquids from penetrating past the surface
4. Cushion layer is an open-celled foam that absorbs moisture from the sub-floor and wicks it away
