University Medicine Patient Center Project

Project Highlights:

University Medicine Patient Center, is a new 54,000 square foot state-of-the-art patient centered facility. The purpose of the new facility is to provide a home where collaboration between Primary Care and Specialty medical practices, can work together as one seamless practice, under the University Medicine umbrella. The facility features collaborative work areas for physicians, other clinicians and administrative personnel, and custom-designed spaces for patient access and functionality. The floor plans include flexible exam rooms for efficient sharing between

medical offices for peak times. The design and interior finishes were selected to complement the natural light, and using warm colors and as much sustainable products throughout. **Tandus** powerbond carpeting was used in waiting areas, that had a 38" pattern repeat. The carpeting was installed to provide a curve to match the soffit, and installed seamless up against the **Tarkett vinyl metal** looking transition strips, and then **Tarkett vinyl wood planking**. The project also had vendor partners like **Ardex, Armstrong,**

Daltile, Johnsonite, Tandus, Centiva, and Mapei. Overall Team Ruggieri provided a skilled installation that will provide a great new facility for University Medicine Group.

This is a 2017 Starnet Worldwide Commercial Flooring Design Award entry.
