New England Revolution New Training Center Project

Project Highlights:

This year the New England Revolution completed its new state-of-the-art training center in Foxboro, MA. This world class 30,000 square foot facility is the new home to the Revolution MLS team, Revolution II, Revolution Academy, and staff. The design and function of the facility fosters an elite environment for competition and player development spanning the First Team to youth academy. The building features a fitness center, spacious team lounges, team dining, locker room, an ultramodern hydrotherapy and rehab area. The original design concept was over budget.

Team Ruggieri worked with the ownership group and architect/designer to bring substantial costs savings to the flooringing portion of the project achieving this without changing the overall design concept, which made all parties happy, using many Starnet vendors. The advanced fitness center highlights **Ecore Rubber Sheet Flooring** and **Grasstex Turf**. Carpeting throughout the facility is 100% **Milliken DalTile Ambassador tile** and **Milliken Modern Bliss Collection** make up the locker room areas. In the rehab and hydrotherapy rooms, we used **DalTile**

Ambassador tile on walls with **Protect-All Vinyl Slip Retardant 5' x 8' panels** glued with urethane epoxy and rapid welded to waterproof and seal the seams. As a result of the installation crews' hard work, the New England Revolution training center is one of the most stunning and serene professional training facilities in all of sports.
