Mount Saint Charles Academy New Hockey Dormitory Project

Project Highlights:

Mount Saint Charles Academy, longtime powerhouse of local high school hockey, would mark a radical shift in its program with the introduction of the Mount Saint Charles Hockey Academy, a high-level boarding program. With this new program, there was a need for an all-male dormitory on campus to house the boarding hockey players that were coming from all parts of the country. The project was approved and started in February 2019 and needed to be completed by September 2019 for the 70 borders coming. Team Ruggieri worked directly with Mount Saint Charles and the construction manager to help design all the flooring aspects

of the project, keeping within the tight budget and assuring them products and installation could be done in a fast track. Besides keeping in budget, Team Ruggieri made sure all products installed could be easily maintained for the school, and would stand up to the abuse from the students living in the dorm. This project contains 100% Starnet Vendor products, with the highlights of **Milliken Carpet Tile** throughout the hallways and meeting rooms. **Roppe Nature timbers vinyl plank** was used in the student rooms, and **Mannington Assurance slip retardant sheet**

flooring, flash covered up the walls with welded seams to make up the bathrooms. **Roppe Contour Millwork** base, rubber treads and tile also were used in the common spaces. In the lower level of the building, is where the state of the art fitness center and rehab area is located for the school. We worked with **Encore Rubber**, and incorporated the school colors in the design. The main entry of the facility has **Mats Inc Berber tile**, with a custom school Logo cut into the walk off mat. The project was a success, opening on time, and stayed within the budget.
